

<b>Object Oriented Programming</b>					
<b>Course Code</b> CIF62003	<b>Student Workload</b> 150 hours	<b>Credits</b> (according to ECTS) 7,5 ECTS (6 for theory and 1.5 for practical work)	<b>Semester</b> Sem. 2	<b>Frequency</b> each even-semester	<b>Duration</b> 16 meetings
<b>1</b>	<b>Types of courses</b> <i>compulsory (study programme level)</i>	<b>contact hours</b> 105 hours	<b>independent study</b> 45 hours	<b>class size</b> 20-40 students	
<b>2</b>	<b>Prerequisites for participation</b> Have completed Basic Programming course				
<b>3</b>	<p><b>Learning outcomes</b></p> <p>IF-PLO-2 Graduates have the ability to be scientific, work collaboratively, have a professional attitude, and have good adaptation skills when working in groups or as an individual</p> <p>IF-PLO-3 Graduates are able to develop professional careers in the field of computer science based on quality aspects, data-based decision making, be responsible, and make continuous improvements.</p> <p>IF-PLO-4 Graduates have the ability to think computationally, design-based thinking, conduct analysis with scientific writing, and are able to apply the values of Technopreneurship in creating product innovations in the Systems or Information Technology domain.</p> <p>IF-PLO-7 Mastering the theoretical concept and principles of computer science, especially in the aspect of algorithms, programming, intelligent systems, information management, parallel and distributed computing, information security, human-computer interaction, software engineering, and fundamentals of computer systems and networks.</p> <p>IF-PLO-13 Graduates are able to perform abstraction, modeling, representation, and data acquisition in order to perform the data analysis.</p>				
<b>4</b>	<p><b>Subject aims</b></p> <p>Students are able to understand the basic concepts of object-oriented programming, inheritance, polymorphism.</p> <p>Students are able to understand the concepts of encapsulation, access rights and collection.</p>				

	<p>Students are able to understand and use abstract classes, interfaces, exceptions and generic classes.</p> <p>Students are able to create programs using object-oriented programming concepts.</p>
<b>5</b>	<p><b>Teaching methods</b></p> <p>lectures, case study, class discussion, presentation</p>
<b>6</b>	<p><b>Assessment methods</b></p> <p>assignment, mid-term examination, end-term examination, project evaluation, practical-skill assessment</p>
<b>7</b>	<p><b>This module is used in the following degree programs as well</b></p>
<b>8</b>	<p><b>Responsibility for module</b></p>
<b>9</b>	<p><b>Other information</b></p> <p>1 Y. Daniel Liang, Introduction to Java Programming Comprehensive Edition 11th Edition. Pearson.</p> <p>2 Bernd Bruegge &amp; Allen H. Dutoit, 2010, Object-Oriented Software Engineering using UML, Patterns, and Java™ Third Edition</p>
